# Matrix42 Software Asset Management Basics

You will learn how to leverage and exploit the full potential of Matrix42 Software Asset Management. The training will be held in german.

## Description

### Learning Objectives

Our 2-day product training will teach you how to leverage and exploit the full potential of Matrix42 Software Asset Management. You will learn how to adjust processes and rules optimally to your company's requirements and conditions. The goal is the effective usage of the system to gather, validate and interpret all data with minimum efforts. This will enable you to implement software asset management under consideration of your infrastructure and software vendors' requirements.

### Target Groups

Business staff license management, SAM officers, IT license managers, IT controllers, business users/line managers from IT controlling/contract management or budget management, workspace management or IT administrators, ITSM process owners, Matrix42 partners

### Content

- SAM administration:
  - System configuration, objects and services
- SAM masterdata:

- Organization within Matrix42 Software Asset Management
- IT asset management
  - Manage systems for mapping compliance
  - Identify applications and analyze their usage
- SAM operations
  - Control license needs assessment
  - Administrate and evaluate license agreements
  - Administrate the business license inventory
  - Manage every-day work
- SAM baseline
  - Compliance reporting

### Prerequisites

Basic knowledge of how to use Matrix42 Software Asset Management and Service Management. Basic knowledge of the licensing programs and models of common vendors. The training will be held in german.

### Training Location

**Due to the actual situation, all trainings will take place online until further notice.**
