

## MATRIX42 MARKETPLACE PRODUCTS

# MakroAccess42 – Module for Makro Factory Breeze

MakroAccess42 is a Makro Factory solution based on the BI solution Bissantz DeltaMaster. MakroAccess42 displays the rights granted or withdrawn to / from employees within a particular period of time on a daily, weekly or monthly basis. It is specifically designed as an add-on for our solution Breeze. Please note that the price is valid for a term of 3 years and is for a scale of up to 500 users. Contact Makro Factory for an individual offer.

## Description

### In case you already own Makro Factory Breeze:

In case you already own [Makro Factory Breeze](#) licenses, you obviously don't need to purchase the license again. In this case it's sufficient to purchase the MakroAccess42 add-on.

### Why MakroAccess42?

The Makro Factory BI solution provides you with information regarding who has access to which application at what level. The application is slim, fast and delivers a lightning-fast result! MakroAccess42 gives you the answer – immediately and at a glance.

MakroAccess42 natively supports the rights management of the Matrix42 suite. Additional applications can be added easily and independently thanks to open database interfaces. MakroAccess42 **answers the important w-questions** of rights management: who is allowed to do what why and since when?

Especially with regards to the GDPR guidelines MakroAccess42 helps you **keep track of all rights assigned**.

**When? "Just" a recertification...**

The cyclical requirements for regular monitoring of employees' rights assume enormous proportions, especially in the context of "recertification".

MakroAccess42 takes over this task completely so that more time remains for risk minimization and is not wasted on data processing.

### **What? Deeper privileges?**

Is your company working with rights profiles? Often more in-depth authorizations are required for a profile resulting in considerable effort when being cyclically revised.

MakroAccess42 provides exact deltas between two points in time and compares the authorizations in detail. This gives you an exact picture of the "actual state" which can be evaluated.

### **Where to? Changes in rights**

Did you know that an employee changes an average of 15,000 rights per month? Due to the dynamic nature of IT, the focus is more than ever on the rights granted. New applications, employee changes or changed areas of responsibility continuously influence the rights granted.

MakroAccess42 reflects this change in the form of a time delta in an understandable and simplified way, making it comprehensible and controllable.
