MATRIX42 MARKETPLACE PRODUCTS

Report2File

Report2File enables the filing and sending of reports in various file formats.

Description

Labtagon Report2File

is an extension for the Matrix42 Digital Workspace Management System (Service Store), that extends the range of function by sending and downloading reports in various formats.

Report2File enables the run of SQL Reportserver Reports in dialogs, wizard or workflows. The Reports are issued in any required data-formats, can be downloaded, can be sent by E-Mail or attached as an attachment to a Matrix-Object.
You can choose from all the file formats that supports the customer's SQL report server.

This product is compatible with all current Matrix42 versions under maintenance and support.

Features

The Labtagon Report2File has the following features:

- Configuration within a dialog or a wizard to output reports and their files
- Workflow Activity for creating a report
- Upload the file created by the created report as an attachment
- Sending the file as an attachment via e-mail
- Depending on the report server output in different file formats (PDF, Excel, Word etc.)

The installation package includes the following components:

- Easy installation via Windows Setup
- Manual with detailed description of installation and configuration

Advantages

- No media break through natheless integration into existing processes
- Easy to integrate into the existing environment
- Fast output of reports in different file formats (depending on the report server used), if only a storage in the database is not sufficient

Use cases

- Provide digitally submitted signatures as an expression.
- Overviews of asset management, e.g. Number of orders, open orders, unused licenses, etc.
- Providing overviews from the service desk (utilization, tickets received, tickets processed, etc.)
