MATRIX42 MARKETPLACE PRODUCTS

PackageCloud Subscription

Get the most popular applications pre-packaged for a fixed price.

Description

You know the problem – you need to roll out a new version of a key business application. Everyone is waiting for it. But nobody has the time to take care of the packaging, quality assurance and documentation. Application packaging can be a time-consuming task that requires experience and expertise, especially since it's not something you do every day. The Matrix42 PackageCloud offers a wide range of business relevant applications as pre-packaged software - at a FIXED PRICE!

You can download a list with supported software here.

Key Features

- Packages for 380 software products (March 2024)
- Quality-assured software packages from the German market leader.
- Simple and fast deployment of applications as cloud services.
- A dedicated team takes care of creation, updates, and quality assurance.
- Multilingual packages (German and English versions for all packages, newer packages also in French).
- Approved and tested platforms - Windows 8/8.1 (x86, x64), Windows 10 (x86, x64) and Windows 11 (x64).
- Suitable for software distribution via Matrix42 Client Management.
- Single package for installation, repair, and uninstallation - templates can be taken from the PackageCloud.
- Package customisation to meet individual customer requirements.
- Comprehensive documentation per package.

- Seamless integration into the Matrix42 product portfolio and support processes.
- Fixed price for all packages.

Your benefits

- High reliability and security during rollouts through quality-tested packages certified by Matrix42.
- Rapid ROI and significant savings through fast rollouts and immediate use of the Package Cloud.
- Easy installation of business-relevant packages pre-configured by experts (best practices).
- Access to pre-configured packages for every piece of software increases efficiency and reduces costs for the organisation. IT departments can ensure fast and easy access to software, including the latest versions.
- Users also benefit. They can install software without technical knowledge (at the touch of a button). In addition, all settings can be pre-set so that a user can install software and start using it immediately.
- Reduce security risks and control software installation by creating a standardised environment. Avoid errors, both service and user, by providing a stable environment.
- Quickly uninstall without leaving a trace.
- Achieve more in less time by taking advantage of pre-built and standardised software packages.

Important notes:
The license number is related to the existing license number of your Client Management product.
This product is for customers with min. 250 users.
