Mobile Asset and Inventory App

Modern management of your assets with the iOS App "Mobile Asset and Inventory App for Matrix42"

Description

Modern management of your assets with the "Mobile Asset and Inventory App for Matrix42".

The iOS App offers a bidirectional interface to the Matrix42 Software Asset Management solution
and supports among others the following use cases:

- Create larger delivery quantites or individual new assets quickly and easily via app and barcode scan
- Simplify asset delivery and return process
- Update existing assets, such as general and commercial data, photos of invoices, delivery bills, add workstations directly as attachments
- Retrieve asset details adhoc via barcode / QR code scan or manuel search
- Send barcode / QR code to a Zebra printer for printing
- Create new inventory lists and display the current state of the inventories at any time
- Take inventory via Bluetooth handheld scanner or smartphone camera
- Scan barcode / QR code in front of an office, room or workstation and display the target state directly in the app. Mark everything as inventories with one click
- Create a Quick-Ticket for an asset
