

## Matrix42 Marketplace Products

# Create Object

Creates an new object of any configuration item

## Description

With the action **Create a new object** a new object of any configuration item can be created. In the configuration of the Action can be set which fields from the source object are to be copied to the new object. Alternatively, ASQL expressions can be defined to determine filed valued for the new object After the new object has been created, a dialog for it opens where additional changes can be made.
