

## Matrix42 Marketplace Products

# Start Provisioning Workflow

Start provisioning workflow for given orders

## Description

The Start Provisioning Workflow is a new windows command-line application with an analog behavior of the Service Store standard Provisioning Workflow. The application can be invoked with one parameter: Ticket number of the Service order **Benefits:**

- Gives the possibility of being manually executed
- Allows to start provisioning workflow for many orders simultaneously
- can be seamlessly integrated into Automation processes
- very easy to use

### Use Cases:

- Order and Service bookings are automatically imported from a foreign system and not generated manually in Matrix42 Service Portal
- Restart failed Provisioning Workflows
- fast Workflow Testing in acceptance environments
