Scheduled Service Provisioning

The ITSM add-on enables scheduled service provisioning, so the provisioning of each service can be planned and assigned at the right time. **The number of licenses is based on the number of licenses of the existing Workspace Management product. Please contact your sales representative for an individual offer.**

Description

The ITSM add-on enables scheduled service provisioning, so the provisioning of each service can be planned and assigned at the right time.

Features:

The extension enables you to install, repair and uninstall each service at a defined timeframe and comes with a lot of extra functionality to support your processes.

With a bundle of additional web-services, it's the perfect addition for integrating 3rd-party applications to your enterprise servicemanagement.

Out of the box this add-on supports you to add a queued scheduled uninstallation by adding an installation (for example for temporary access-rights or software-usage).

The product by default comes with a lot of useful assistance and additional functionalities to get your services to your customers at the right time.

Technical requirements:

- Matrix42 Enterprise Service Management (the standard supported versions)
