Extended Copy

Define actions to create copies of an object where specific attributes get preconfigured values.

Description

The App **Extended Copy** allows an administrator to define Actions that can copy any object to new objects conforming to a pre-defined template. It can be freely specified which attributes are to be copied, whether prefixes are to be used, and whether there will be user interaction during copying. Advantages are:

- Creating objects with meaningful attribute values
- Rapid creation of data that satisfy integrity criteria
- One implementation for numerous copying definitions
