Advanced Search

Search for objects according to your user-defined criteria

Description

The App **Advanced search** allows a user to search for objects according to user-defined criteria. The selection of search fields is not limited to the fields visible in the search page. The query can be saved as a search template for re-use. Advantages are:

- Flexible use: you can run the wizard from an action or a quick start custom grouping the search criteria is possible
- The selection of searchable attributes is unlimited
- Hierarchical search: 3 drill down search levels about the relations are possible
