Signature Control

Signature control, the as simple method to signating using a technical evidence for digital created signature.

Description

Labtagon Signature Control

is an extension to the Matrix42 workspace management system that provides tamper-proof digital signing, such as evidence, receipts, agreements, or similar.

Use the Signature Control for technical proof of digitally created signatures!

The optional integrity check connects the digital signature with the context (purpose), time and persons (verification by the witness). After confirming the signing process, a different use, a link to another object or a change of the signature is no longer possible.

Features

The Labtagon Signature Control has the following features:

- Easy implementation in dialogues or wizards by the Matrix42 Solution Builder Layout Designer.
- Save context (purpose), time, and person with the integrity check signature.
- Sign on PC and mobile devices.

The installation package includes the following components:

- Easy installation via Windows setup and license protection.
- Manual with detailed description of installation and configuration.

Your advantages

- Simple and uncomplicated digital proof.
- Time and effort savings.
- Technical provability due to a combination of the signature in the appropriate context.
- Security due to an optionally adjustable integrity check.

Example use cases

- Receipt or return confirmations of assets.
- General Forms, order forms.
- Permits, e.g. in change management or service orders.

- Signing of agreements and certificates.

More information can be found on our website.
